## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4 are drawn to a breathable protective pad, classified in class 2, subclass 455.
  - II. Claims 5-27 are drawn to shoulder pads, classified in class 2, subclass 459.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention I pertains to a breathable pad that is classified in 2/455 and invention II pertains to a shoulder pads that is classified in 2/459.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

### ***Response to Arguments***

3. The arguments filed on October 24, 2005 have been considered. In view of such a restriction having groups I and II has been made with regard to claims 1-27 as indicated above.
